Project

My Projects (My Projects Page)

[project1_link](#)

Technologies used : HTML, CSS, Bootstrap

Built a webpage for displaying a user's project portfolio to potential interviewers

- Assembled banner area and project cards by leveraging distinct HTML block and inline components.
- Enhanced the site's appearance using CSS3 techniques such as background, flex, and box model properties, as well as relative (vh, vw) and absolute (px) units.

Portfolio Website

[project2_link](#)

Technologies used : HTML, CSS, Bootstrap

A digital platform designed to showcase the talents and achievements of a person, with a focus on their portfolio, skills, and testimonials.

- Expertly crafted using HTML structure elements and Bootstrap components, delivering an attractive and responsive website.

- Includes a testimonial section, displaying glowing endorsements from satisfied clients and peers.

Jobby App

[project3 link](#)

Technologies used : React JS, JS, CSS, Bootstrap, Routing, REST API Calls, Local Storage, JWT Token, Authorization, Authentication

Constructed an all-in-one job searching platform, Jobby App.

- Built pages for Login, Home, Jobs, and Job item details with React components, form inputs, and event handlers.
- Ensured secure authentication with JWT tokens and REST API calls.
- Persisted login state with local storage and protected routes with React Router.
